1.1	Usage . . . . .	3
1.2	API . . . . .	3

This page will contain documentation for various Minecraft: Wii U related content, such as pointers, functions, classes, etc. This information was all pulled from various sources (Discord, YouTube, etc.)

Check out the *Usage* section for further information, including how to *Installation* the project.

---

**Note:** This project is under active development, and some information may be incorrect as well.

---

**CONTENTS**

## 1.1 Usage

### 1.1.1 Installation

To use Lumache, first install it using pip:

```
(.venv) $ pip install lumache
```

### 1.1.2 Creating recipes

To retrieve a list of random ingredients, you can use the `lumache.get_random_ingredients()` function:

The `kind` parameter should be either "meat", "fish", or "veggies". Otherwise, `lumache.get_random_ingredients()` will raise an exception.

For example:

```
>>> import lumache
>>> lumache.get_random_ingredients()
['shells', 'gorgonzola', 'parsley']
```

## 1.2 API
